

Nature's Wrath

Kineticist Subclass

3rd Level: Nature's Wrath

Your kinetic gate taps into the raw essence of the natural world. You gain the resilience of ancient forests and the venom of its deadliest creatures.

- **Kinetic Blast Upgrades:** Your kinetic blast can now deal **poison** or **piercing** damage (choose per attack). Range: 60 ft ranged / 5 ft melee.
- **Verdant Resilience:** You gain proficiency in the Nature skill. If you are already proficient, you gain expertise instead. Additionally, you have advantage on saving throws against poison and disease.
- **Warden's Mark** (Bonus Action, accept 1 Burn): You channel primal venom into your next kinetic blast. The next time you hit a creature with a kinetic blast before the end of your turn, you mark it. The marked creature takes **1d6 poison damage** at the start of each of its turns for 1 minute. It can repeat the saving throw (your impulse save DC) at the end of each of its turns, ending the effect on a success. While marked, the creature has **disadvantage** on saving throws against your Toxic Infusion and any other poison effects from your features. This mark does not stack.

7th Level: Nature's Wrath

- **Verdant Growth:** As a bonus action, you can accept 1 Burn to cause a 10-foot radius area of natural ground (dirt, grass, stone) within 60 feet to erupt with thorny vines and roots, becoming difficult terrain for 1 minute (or until you dismiss it as a bonus action). You are immune to the effects of this difficult terrain.
- **Toxic Infusion:** When you hit with a kinetic blast that deals poison damage, you can apply a potent toxin. The target must make a Constitution saving throw (your impulse save DC). On a failure, it is poisoned for 1 minute and takes your kinetic blast damage die as ongoing poison damage at the start of each of its turns. It can repeat the saving throw at the end of each of its turns, ending the effect on a success. This is a substance infusion with a burn cost of 2. You can use this feature a number of times equal to your proficiency bonus per long rest.

10th Level: Nature's Wrath

- **Predator's Instinct:** Your senses sharpen to the rhythms of the hunt. You add your Wisdom modifier (minimum 1) to initiative rolls and to any Dexterity (Stealth) checks made in natural terrain (forests, swamps, grasslands, etc.). Additionally, you can use Warden's Mark without accepting Burn a number of times equal to your proficiency bonus per long rest.

15th Level: Nature's Wrath

Apex Predator

You have become the ultimate expression of nature's cycle of life, death, and renewal. Your features gain the following benefits:

- **Enduring Resilience:** When you use Verdant Resilience to gain advantage on a saving throw against poison or disease, you also gain resistance to poison damage until the end of your next turn. You are immune to the poisoned condition.
- **Potent Toxin:** The Toxic Infusion now requires a Constitution saving throw with disadvantage. Creatures immune to the poisoned condition still suffer the effects but take half damage from the ongoing poison.
- **Primal Sovereign** (Bonus Action, accept 3 Burn): Once per long rest, you can enter a state of Primal Sovereignty for 1 minute. While in this state:
 - You gain a burrow speed equal to your walking speed.
 - You are under the effects of the *pass without trace* spell.
 - Whenever you hit with a kinetic blast that deals poison damage, you can apply Toxic Infusion without using a use of that feature and without the burn cost. The target also takes double your Constitution modifier as extra poison damage.
